Parking Permit Policy:

GBHA has instituted effective February 2, 2026, a parking permit policy; any resident that owns a vehicle must register with the GBHA office by providing up to date registration, proof of insurance, and a handicap placard in the vehicle owner's/resident's name if applicable. This information should be updated annually to ensure correct information is on file as well as if you obtain a new/different vehicle taking the place of the original permitted vehicle. *Having a handicap placard does not automatically provide a handicap parking space.* GBHA currently has the required number of handicapped parking spaces as well as the required number of parking spaces based on the number of apartments at all three property locations. There is no fee for this parking permit. It is required to be installed on the inside driver's side back window. Parking permits are for resident vehicles only. Failure to obtain a parking permit may result in towing your vehicle at owner's expense for our inability to identify the vehicles parked on GBHA property as belonging to a resident. **This is NOT an assignment of parking.** Residents that own more than one vehicle must obtain parking permits for both vehicles. Only one vehicle is allowed to be parked in the resident parking lot, the other should park in the visitor parking lot to allow each resident owning a car to park in the resident parking lot. Residents are responsible for any visitors/guests/resident staff and their vehicles. All visitors/guests/resident staff should be parked in the visitor parking lot. Failure to do so may result in the towing of that vehicle at the owner's expense.

Adopted by GBHA Board of Commissioners 01/28/2026
